

FLOOR SWEEPERS ADJUSTMENTS

- 1- Place the scraper (A) on the highest part of the bottom of the mixing chamber.
- 2- Loosen the bolts, ensuring that they do not fall under the auger and get lost.
- 3- If replacing the scrapers, remove them and put the new ones on the same spot.
- 4- Adjust the bottom of the scraper so that it is approximately $\frac{1}{8}$ of an inch from the bottom of the mixing chamber.
- 5- Repeat these steps to replace the second scraper.
