

PROCEDURE REF# A-MIX-016

## Conveyor belt cleaning

If it is impossible to remove dirt stuck in the conveyor with a pressure washer, there is another possibility.

1- Make sure that the scraper is adjusted the closest to the belt (fig A et B). If needed, adjust with a 17mm wrench.

PROCEDURE REF# A-MIX-016

## Conveyor belt cleaning

2- With the conveyor running slowly, with a pry bar, gently insert from one end (fig C) to the center (fig D) on each side of the table. Repeat on the other side in the same way.
